

## "Inclusive museum, global accessibility"

**Coordinator:** Frederike van Ouwerkerk (ouwerkerk.f[at]nhtv.nl),  
or (Ouwerkerk.F[at]buas.nl)

Our first working group has already nineteen participants from ten countries and three different continents

A first zoom meeting will allow us to get to know each other.

Everyone will have the opportunity to briefly introduce himself and his professional activity and framework. We will also be able to state the motivations that led us to participate in the SIG and what we expect from this exchange.

We will also invite you to present at this first meeting an action, a research, a project that you have carried out or that you intend to carry out in connection with the theme of our SIG. Of course the inclusive museum does not only concern the public with disabilities but all categories of public.

Moreover, we will send you the link to a mental map we have started to develop. This mental map is intended as a synthesis of the topics we wish to discuss with you over the next few months.

Following our first videoconference, we will ask you to enrich it and to position yourself on one of the topics so that we can then determine smaller working groups.

It goes without saying that the inclusive museum does not only concern the public with disabilities but all categories of public.
